

# Professionals Working with Individuals with an ASD and their Families

Updated: November 2018

**PLEASE NOTE:** This list is provided for the purpose of being helpful because it can be difficult to find people and organisations specialised to ASD. It is one we have compiled as a result of our own work at Minds & Hearts. It is not provided as a recommended list of practitioners but does include many people and organisations with whom we work. We update this list every 6 months. Please do let us know any feedback you may have about practitioners or organisations, including new ones we may add to our list.
