

2019 GROUP PROGRAM FOR BOYS

Building Resilience for Boys 14-17 years

WHO

For eight teenagers who are 14 – 17 years old and have a diagnosis of Asperger's Syndrome, Autism Spectrum Disorder or PDDNOS and who have been adversely affected by bullying

Psychologists: Professor Tony Attwood, Clinical Psychologist & Ms. Toneya Ashby, Psychologist

PROGRAMME DESCRIPTION

In recent survey studies, results have indicated that cruel bullying and teasing affects twice as many on the autism spectrum as neurotypical children. Despite many efforts by schools to stop the problem, children are still suffering. Intervention needs to occur at community, school administration, teaching, peer and individual levels. This group programme has been designed to intervene at the individual level by teaching participants about the psychology of the bully, strategies to stop the bullying, and tools to deal with the adverse affects such as anxiety, depression and low self-esteem. The primary aim of the group is to build resilience.
