

# MINDS & HEARTS

A Private Psychology Clinic for  
Autism Spectrum Conditions

### About the Trainer

Deborah Sweeney is a registered psychologist with extensive experience in child assessment. She has achieved a research reliable standard in both the ADI-R and ADOS-2, and has been using them in complex, multi-disciplinary assessments for over 15 years. She now regularly trains health professionals in the ADI-R and ADOS-2 throughout the Asia-Pacific region.

## ADOS-2 Introductory Workshop

Thursday 22nd & Friday 23rd August, 2019

8:30 am – 5:00 pm

Venue:

Royal Queensland Yacht Squadron  
578 Royal Esplanade, Manly QLD 4179

### About the Event

The Autism Diagnostic Observation Schedule Second Edition (ADOS-2) is a semi-structured, standardised assessment of communication, social interaction, and play. It provides a series of standardised contexts in which the individual's social, communication and repetitive, stereotyped behaviours can be observed. It has been designed to assist in the diagnosis of autism and is recommended as a complementary instrument to the Autism Diagnostic Interview Revised (ADI-R). Standardised toys and activities are used to present opportunities for social and communicative interaction with the examiner. During these activities, observation of the individual notes the absence or presence of behaviours of interest. A diagnostic algorithm consistent with DSM-V and ICD-10 clinical diagnoses is generated.
